

PL/SQL Exercise 1: Control Structures

In this exercise, you will learn PL/SQL control structures like IF-THEN-ELSE, CASE, and LOOPS (WHILE, etc.). These are important for decision making and repetitive tasks in database programming.

Example 1: IF-THEN-ELSE Statement (Grading System)

Code:

```
DECLARE
    v_marks NUMBER := 75;
BEGIN
    IF v_marks >= 90 THEN
        DBMS_OUTPUT.PUT_LINE('Grade: A');
    ELSIF v_marks >= 75 THEN
        DBMS_OUTPUT.PUT_LINE('Grade: B');
    ELSE
        DBMS_OUTPUT.PUT_LINE('Grade: C');
    END IF;
END;
```

Output:

Grade: B

Screenshot:

[SQL Worksheet]*      Aa 

```
1 DECLARE
2   v_marks NUMBER := 75;
3 BEGIN
4   IF v_marks >= 90 THEN
5     DBMS_OUTPUT.PUT_LINE('Grade: A');
6   ELSIF v_marks >= 75 THEN
7     DBMS_OUTPUT.PUT_LINE('Grade: B');
```

Query result **Script output** DBMS output Explain Plan SQL history

Grade: B 

PL/SQL procedure successfully completed.

Elapsed: 00:00:00.006

Example 2: WHILE LOOP (Number Print)

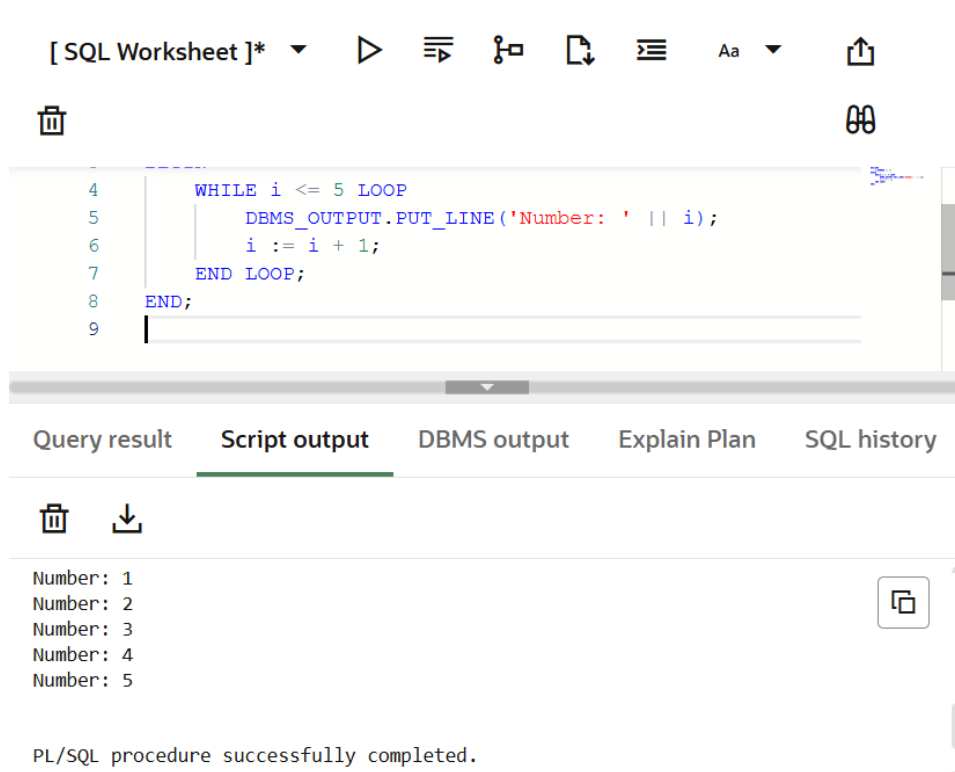

Code:

```
DECLARE
  i NUMBER := 1;
BEGIN
  WHILE i <= 5 LOOP
    DBMS_OUTPUT.PUT_LINE('Number: ' || i);
    i := i + 1;
  END LOOP;
END;
```

Output:

Number: 1
Number: 2
Number: 3
Number: 4
Number: 5

Screenshot:

Example 3: CASE Statement (Day Check)

Code:

```
DECLARE
    v_day VARCHAR2(10) := 'WEDNESDAY';
BEGIN
    CASE v_day
        WHEN 'MONDAY' THEN DBMS_OUTPUT.PUT_LINE('Start of the week');
        WHEN 'FRIDAY' THEN DBMS_OUTPUT.PUT_LINE('Weekend is near');
        WHEN 'SUNDAY' THEN DBMS_OUTPUT.PUT_LINE('Rest day');
        ELSE DBMS_OUTPUT.PUT_LINE('Midweek day');
    END CASE;
END;
```

Output:

Midweek day

Screenshot:

[SQL Worksheet]*

Aa

```
6      WHEN 'FRIDAY' THEN DBMS_OUTPUT.PUT_LINE('Weekend');
7      WHEN 'SUNDAY' THEN DBMS_OUTPUT.PUT_LINE('Rest day');
8      ELSE DBMS_OUTPUT.PUT_LINE('Midweek day');
9  END CASE;
10 END;
11
```

Query result
